

OUR SERVICE WILL... STREAMLINE ENTERPRISE E-SHIPPING

EQUIPING COMPANIES WITH THE TOOLS NEEDED TO SHIP SMARTER

NEOPOST Loop One is part of the NEOPOST Group, the second largest supplier of mailroom and shipping systems in the world. NEOPOST Loop One provides Internet shipping solutions that facilitate the use of your contracted carriers. The robust feature set of our eShipping Service will help your organization process shipments more efficiently and cost effectively.

Improve Shipping Spend Management

Spend management is critical to improving your company's bottom line. For many large organizations, parcel shipping is a major expense category that is not carefully controlled. With NEOPOST Loop One's eShipping Service, your organization can:

- Build and schedule custom shipping reports to better understand and gain control of your organization's shipping budget.
- Allocate shipping costs to appropriate cost centers through third party procurement applications, or via NEOPOST Loop One's own reporting.
- Reduce "express shipment" abuse by controlling the types of delivery services made available to individual shippers.

Help you Ship Smarter

NEOPOST Loop One's eShipping Service can improve your organization's operational shipping efficiency by helping your employees:

- Use preferred carriers or the one that offers the best rate, which can dramatically reduce your overall shipping expenses.
- Correct address errors that typically result in additional fees applied by the carriers on top of the original rate quote.
- Understand that next-day afternoon delivery costs substantially less than next-day early morning service.

In today's competitive environment, companies must ascertain the financial impact of new services on their operations to justify new investments. NEOPOST Loop One's eShipping Service delivers tangible financial results by:

- Service Level Optimization - identifies less expensive service levels that still meet the shipper's needs.
- Reducing additional carrier fees that result from incorrect addresses or address formats.
- Integrating with popular eProcurement applications to accelerate the pervasive use of those investments.
- Enhancing accountability through cost recovery and the ability to create and schedule custom shipping reports.
- Minimizing deployment costs, as the service is easy to use and only requires a web browser and Internet connectivity at the desktop.
- Reducing on-going maintenance costs; no rates to update, no manifests to upload at the end of the day, and no servers to operate and maintain.

Contact NEOPOST Loop One today and start streamlining your organization's shipping processes.
